Orthopedic

Our Maxxeus orthopedic line provides surgeons with superior quality grafts that have been handled and developed for use in a wide variety of surgeries. All of our donors pass a rigorous screening process before undergoing processing using a proprietary method that has been validated to a Sterility Assurance Level (SAL) of 10^{-6} .

Foot & Ankle

Maxxus foot & ankle allografts are designed to offer time saving features such as pre-shaped wedges and plugs. All foot & ankle allografts are terminally sterilized to achieve a Sterility Assurance Level (SAL) of 10^{-6} within the final packaging.

Structural Grafts

Maxxeus offers a wide range of solutions for interbody spacers comprised of either cortical, cancellous or a combination of both cortical and cancellous bone. All donors have passed a rigorous screening process beforehand and the allografts were processed using a proprietary method that has been validated to a Sterility Assurance Level of (SAL) of 10^{-6} .

Sports Medicine

Maxxeus sports grafts are engineered with a specific goal in mind: to assist the surgeon in restoring movement to the recipient. A wide-ranging offering of tissue grafts affords surgeons the opportunity to find exactly what they need for a variety of situations, and helps patients return to an active lifestyle.

Bone Tendons

Electron Beam (E-Beam) sterilization was researched and designed to become the premier option for surgeons that are in search of soft tissue allografts that are not gamma irradiated, yet achieve a Sterility Assurance Level (SAL) of 10^{-6} within the final packaging.

Aseptic Allografts are manufactured in an ISO 5 Class environment. The sterility of the final product is tested using microbiological verification testing per USP <71>, Sterility Tests. Tissue is released for transplantation following 14 day culture results from a validated membrane filtration test.

Allograft	E-Beam	Gamma	Aseptic	Freeze Dried

Wound Care

Burn care skin allografts from Maxxeus have assisted surgeons around the world in saving and enhancing the lives of thousands of people. When it comes to severe burn injuries, surgeons understand that skin allografts from Maxxeus are of the utmost quality and meet or exceed all standards set by the FDA and the AATB.

In partnership with MTF Biologics, Maxxeus by CTS is able to secure the availability of skin for burn allografts worldwide.

MTF Biologics is a registered trademark of the Musculoskeletal Transplant Foundation

* Additional burn care allografts and sizes may be available upon request; please consult your Customer Service Representative for details.

NEW Large Meshed Skin

Available in sizes ranging from 600-1800 cm² in 25 cm² increments. To find out more or to order, call Maxxeus Customer Service at 800-684-7783.

Bubba the Bear Program

Bubba the Bear was created for children healing from severe burns. Bubba and his friends help children understand how burn injuries can happen to anyone and with the help of skin grafts, treatment of burns can occur. The book tells the story of Bubba the Bear who was burned in a campfire accident. Bubba receives skin grafts for treatment of his burns and heals from his wounds.

It is our hope that children will identify with Bubba the Bear and find comfort and hope in his story. Bubba the plush bear can journey with each child during his or her treatment of severe burns.

Hospital staff may add to or change the bear's bandages to match the child's bandages and autograph the book.

This program is available to our valued customers free of charge. For more information about the program, please e-mail us at bubbathebear@communitytissue.org.

Bubba the Bear Kit Includes:

- Interactive Reading and Coloring Book (also available in Spanish)
- Bubba the Plush Bear
- Set of Crayons
- Drawstring Backpack

Dental

Maxxeus dental offers a wide range of allografts such as bone particulates, resorbable membranes, and specialty grafts, for dental applications including socket extraction, periodontal defects, sinus augmentation and ridge preservation. All of our allograft offerings are held to the highest standard and come with a **STERILE R** rating. Maxxeus dental offers the largest assortment of human osseous and membrane products for oral reconstruction.

Allograft Particulates in Dappen Dishes

Product	Particulate Size	0.25 cc	0.5 cc	1.0 cc	2.0 cc
Cortical Mineralized/ Demineralized Blend	0.25-1.00mm	—	MM005	MM010	MM020
Corticocancellous	0.25-0.50mm	MH025	MH005	MH010	MH020

Allograft Particulates

Maxxeus leads the dental industry in offering the widest variety of bone type and particulate ranges to suit any clinician's preference. A variety of volumes are offered to give the clinician complete control over the quantity used in every procedure.

Cortical Min./Demin. Blend

Cortical Mineralized/Demineralized Blend is a premium graft offering which combines approximately 70% mineralized cortical bone with 30% demineralized cortical bone in an optimal mixture for rapid bone regeneration.

Corticocancellous

Corticocancellous combines mineralized dense cortical bone and porous cancellous bone in one graft.

Cancellous

Cancellous bone, also known as spongy or trabecular bone, allows for increased blood flow around a graft site.

Product	Particulate Size	0.25 cc	0.5 cc	1.0 cc	2.0 cc
Cortical Mineralized/ Demineralized Blend	0.25-1.00mm	—	DM005	DM010	DM020

	0.5-1.0mm	DZ025	DZ005	DZ010	DZ020
Cancellous	0.25-0.50mm	DR025	DR005	DR010	DR020
	0.25-1.00mm	DK025	DK005	DK010	DK020
	0.5-1.0mm	DA025	DA005	DA010	DA020
	1.0-2.0mm	—	DL005	DL010	DL020

Allograft Particulates

Cortical

Cortical bone is dense compact bone that will maintain space in a graft site. Slower resorption time than cancellous bone means this graft is good for maintaining space.

Cortical Demineralized

Removing the majority of the mineral content of the bone, primarily calcium, exposes biologically active bone morphogenetic proteins that promotes an osteoinductive reaction at the graft site.

Product	Particulate Size	0.25 cc	0.5 cc	1.0 cc	2.0 cc
Cortical	0.125-0.850mm	DN025	DN005	DN010	DN020

Shelf Life: 3 years

Maxxeus Wound Dressings are provided 10 per pack

Xenograft Particulates

Bone Particulates in Syringe

Product	Particulate Size	0.25 cc	0.5 cc
Cancellous	0.25-1.00mm	OK025	OK005
	1.0-2.0mm	—	OL055

Shelf Life: 3 years

Bone Particulates in Jar

Product	Particulate Size	0.25 g	0.5 g	1.0 g	2.0 g
Cancellous	0.25-1.00mm	XK005 (0.54 cc)	XK010 (1.08 cc)	XK020 (2.16 cc)	XK040 (4.32 cc)
	1.00-2.00mm	—	XL020 (2.0 cc)	XL040 (4.0 cc)	XL080 (8.0 cc)

Shelf Life: 3 years

Customer Service

Our dedicated Customer Service Team is leading the industry with a host of technological advancements that integrate custom features within the allograft reservation process. In addition, 100% of allograft reservations are recorded for quality and training purposes.

Customer Service Contacts

To place an order, please contact a member of our Customer Service Team at **800-684-7783** or email:

For Domestic orders: tissuecustomerservice@maxxeus.com

For International orders: internationalorders@maxxeus.com

To place an online dental order, please visit: www.maxxeussdental.org

HeadsUp Information Systems

In correlation with our national allograft reservation system, Community Tissue Services was the first tissue bank to launch HeadsUp, a proprietary experience that allows customer information to be customized.

What can be customized?

- Personalizing clinician graft specifications
- Previous order snapshots
- Unique shipping instructions
- Storage conditions
- Delivery options
- Contact information for hospital personnel
- Return Authorization (RA) information
- Current order status

Tissue Implant Log

To help our customers stay compliant with Joint Commission requirements, Maxxeus offers tissue tracking logs free of charge.

Licensure & Accreditation

Community Tissue Services is registered with the Food and Drug Administration (FDA), accredited by the American Association of Tissue Banks (AATB), and maintains all applicable state licenses. The Center for Tissue, Innovation and Research is ISO 13485 certified. For access to all of our licenses and certificates, please visit our website at www.maxxeus.com/licenses.

Delivery Process

- Frozen tissue are carefully packaged on dry ice within insulated containers to maintain temperature integrity during transit.
- Maxxeus can ship overnight to almost any location within the United States.
- All orders are subject to a delivery fee. Please contact our Customer Service Team for more information.
- STAT and first overnight shipments will be quoted at time of order.

Return Policy

- All return orders require a Return Authorization (RA) number before product may be returned for credit. Please contact the Maxxeus Customer Service Team to obtain a RA number.
- Freeze-dried and frozen tissue may be returned within 30 days of order, providing the integrity of tissue and packaging has not been compromised.
- A Documentation of Storage Form (SM-501-F-02) must be completed for opened frozen boxes and requires an employee signature from the returning facility. Failure to complete the Documentation of Storage Form may result in no credit issued.
- All return orders are subject to a re-stocking fee of \$50 for each order returned for credit. This fee will help cover resources that were used to service the graft request.
- Opened frozen boxes are subject to a \$100 recertification fee and subject to a return shipping fee (facilities that ship at their own expense will not be invoiced the return shipping fee). The \$50 re-stocking fee will be waived when the recertification fee is applied.
